Linux 6.7 to drop support for IA-64

- IA-64 - Itanium family of 64-bit Intel microprocessors
- CPUs supporting IA-64 discontinued by Intel in 2019

"The Itanium architecture is obsolete, and an informal survey reveals that any residual use of Itanium hardware in production is mostly HP-UX or OpenVMS based. The use of Linux on Itanium appears to be limited to enthusiasts that occasionally boot a fresh Linux kernel to see whether things are still working as intended, and perhaps to churn out some distro packages that are rarely used in practice."

Maintainer Of The NVIDIA Open-Source "Nouveau" Linux Kernel Driver Resigns
