HTTP2 rapid reset attack

- HTTP2 DDOS attack, ~398mil requests/s
- Disclosed by Google/Cloudflare/AWS
-

Raspberry Pi OS

- Now based on Debian 12 Bookworm
- Wayland instead of X11
   - Using Wayfire as a compositor
- PipeWire instead of PulseAudio
- Raspberry Pi optimised Firefox

Ubuntu 23.10 Desktop ISOs recalled

- User-submitted translations for installer contains hate-speech
- "A community contributor submitted offensive Ukrainian translations to a public, third party online service that we use to provide language support for the Ubuntu Desktop installer."
- Fixed and back up now
